What do you want MOST for your child? Most parents want their children to be HAPPY.

CHANGE YOUR PERSPECTIVE
CHANGE YOUR THOUGHTS
CHANGE YOUR LIFE

Research shows that by practising gratitude daily you can not only increase your levels of happiness but also have a positive effect on your health and well-being.

This soft cover 5×7" journal with 110 pages, is perfect for your child aged from around 6 years +

On each day there is a space to enter three things they are grateful for. Research shows that practicing gratitude increases levels of happiness as well as having a positive impact on your health and well-being.

Teaching our children from a young age to look for the good each day, is teaching them a way to be happy no matter the situation they may be in. There are always things that we can be grateful for.

Also included is a happiness scale which can be coloured in each day and is a great way for parents to flick through the pages to check their kids are doing OK. If it is low a lot maybe have a chat about why they are feeling unhappy.

There are prompts for what you can be grateful for, happiness and self-care tips as well as beautiful hand-drawn colouring-in pages by other kids. Colouring in has shown to be a great way to practice mindfulness and calm down.

Purchasing a gratitude journal for your child is such an amazing gift, that could help create a life of happiness for your child, simply by teaching them to change their thoughts and change their perspective each day. What more could any of us want than a happy child?

*When ordering you will receive one journal (Unless you choose otherwise in your cart). The following images are showing examples of the different pages of the journal for advertising purposes only.
